History
Financial institution Mandiri was established on 2 Oct 1998 as part of the Government of Indonesia's bank reorientating program. In September 1999, four state-owned financial institutions - Financial institution Bumi Daya, Financial institution Dagang Negara, Financial institution Ekspor Impor Philippines and Financial institution Pembangunan Philippines - combined with Financial institution Mandiri. Each of the four heritage financial institutions had unquestionably key and essential role in the development of the Indonesian economic climate. Today, financial institution Mandiri carries on the more than 140-year custom of causing the financial industry and the Indonesian economic climate.

Value and Tag Line
The value of the company is "TIPCE", which stands for Trust, Integrity, Professionalism, Customer Focus and Excellence. Meanwhile, the tag line of the company is “Terdepan, Terpercaya, Tumbuh Bersama Anda”

Vision and Mission
Vision:
To Be Indonesia's Most Admired & Progressive Financial Institution
Mission:
• To be market oriented
• To enhance professionalism
• To maximize returns to stakeholders
• To have an open management approach
• To demonstrate concern for the community and environment

Theory of Sustainable Business
Sustainable business is a process to create business who have long term vision. There is a
three Fundamental Aspect to create a Sustain Business which are:

1. Good commitment with the BOD, BOC, Stakeholders and Employee’s for the company programs.
2. Support by great systems for improvement and adaptation such as Good Management system, comprehensive Marketing Strategy, integrated financial strategy and also supportive Human Resources Management.
3. The Establishment of Corporate Culture based on their vision and mission, to create the harmony environment in the company itself.

After the three aspects have already established, the Company will reach the harmony of business process. So, it can to increase of the company branding, increase the marketing sales, management system, and financial strategy, to achieve the main goal which is generates profits stable. Based on this the company must have one other activity which is CSR program to succor their surrounding society. With this theory be expected to become “trickle down effect” to many other companies. (Cahyana Ahmadjayadi, 2012)

**Theory of CSR Programs effectiveness to society or environmental**

According to “Rudito,Bambang (2011)”. There are four criteria of effective Corporate Social Responsibility (CSR) therefore:

1. The execution is integrated to the Corporate Social Responsibility program vision and mission.
2. The Corporate Social Program give real impact to the society (object)
3. The impact should empowers the society
4. And the program is run sustainably until the object of the program has been considered independent.

**Methodology**

This chapter explains about the steps of how the research is conducted. The methodology is consists of gathering data method, research design, data gathering, data analysis method and conclusion.

**Research Design**

First thing that has to be done when doing a research is to build research design. Research design contains an overview about each step and illustration about what writer do from the beginning of the thesis until the end. Research design created as a guideline to be followed by writer in order to achieve the report objectives. In this thesis, the research design is formed as follow:

**Data Gathering**

Next step of this research and evaluation is collecting all the data that the Author needs. By spreading a questioner to the Wirausaha Mandiri participants to achieve the desired data for desired informations. For the Wirausaha Mandiri Program, the data can be collected also from the annually report of PT. Bank Mandiri “Pelaksanaan Program Kemitraan dan Bina Lingkungan (PKBL) Bank Mandiri. Those data contains about the annually CSR Program PT. Bank Mandiri, and also The Author added another book for the references “Panduan Lengkap Perencanaan Corporate Social Responsibility.”, “Laporan Tahunan Program Kemitraan & Bina Lingkungan 2011 and 2010”, and “Laporan Tahunan PT. Bank Mandiri 2011”

**Data Analysis**

After data collection, those data need to be analyzing in order to get result that can sole the research problems. These are those steps that will be done in order to analyze data. To analyze and to evaluate the execution of the PT. Bank Mandiri CSR program, the Author uses the 4 step of analyze and evaluated data which are:

1. After collecting all of the questioner data, the Author recaps the data and then using it to evaluate and analyzing the effective of Wirausaha Mandiri Program to the participants.
2. Secondary Data collected are use to support the data that collected from observation, interview, and Focus Group Discussion. Secondary Data obtained from the member of PT. Bank Mandiri CSR Employee, Participant, books and other sources (internet, etc)
3. Interview is used to gather the information or opinion from the informant by doing face-to-face chat or interview with the people in the project’ s area. The informants of this interview are people who can give deep information about the Authors Project.

3.1 In-depth Interview which is done by gathering information continually to the informant. In doing this interview, there is no guidance that manages the interview, so the
information that is gathered can be more widespread and it also can avoid the awkwardness during the interview. This interview does not ignore the guidance, but develop the interview guidance to get the variance information according to the knowledge and ideas that are known and understood by the informants. With this interview, the data that is gathered was expected to be more specific and authentic.

3.2 Structured Interview was conducted to gather data and individual live experience by doing interview based on interview guides that has been prepared previously. The author interview some participants that have participate the Wirausaha Muda Mandiri from the long time since presents.

3.3 Short Interview was done in short time and can be the guideline to conduct structured interview and in-depth interview.

Conclusion

Wirausaha Muda Mandiri has give big contribution by increasing entrepreneur rate in Indonesia, it shown that PT. Bank Mandiri already create 6300 new entrepreneur, who also give opportunity to create new job field, and decreasing unemployment rate in Indonesia. For the recommendation first is do some improvement in chain of command and controlling system, second PT. Bank Mandiri should make database of participant’s business progress, as supporting device to easily maintain the participant’s company, and the last is PT. Bank Mandiri should maintain all the participant, not only the winners but also the non winning participant.
